THE BIGGEST SCAM IN THE HISTORY OF MANKIND (in 7 Easy Steps)

**STEP 1.** Government creates glorified I.O.U.s

Please be aware our national debt pursuit is the most prolific fraud in all human history. The massive lie has only been able to continue for so long because the people of this country are uninformed and thus can't possibly know the truth. The Federal Reserve, controlled by the banks, tricked the government into trusting them with our money and their promises.

**STEP 2.** Banks swap I.O.U.s to create currency

The Federal Reserve, controlled by the banks, tricked the government into trusting them with our money and their promises. The banks create new money and sell it to the government, which pays the banks to create currency. This process is a scam because it creates money out of thin air.

**STEP 3.** Government spends the numbers

The government spends the numbers and passes it off as economic activity. This is a scam because it creates the illusion of economic growth by spending money that does not actually exist.

**STEP 4.** Banks multiply the numbers

The banks take the government's IOUs and multiply them through the process of fractional reserve banking. This is a scam because it creates the illusion of economic growth by increasing the supply of money.

**STEP 5.** Our numbers are taxed

We pay for the IOUs with the money we earn on the presumption that the Fed's promise will be redeemed. However, the Fed has no intention of redeeming its IOUs and will continue to print more money. This process is a scam because it taxes our money without our consent.

**STEP 6.** Debt Ceiling delusion

The government creates a debt ceiling to prevent the country from defaulting on its IOUs. However, the debt ceiling is a scam because it is a way for the government to shift the burden of its IOUs onto future generations.

**STEP 7.** Secret owners take their cut

The secret owners of the banks take their cut of the IOUs and use it to manipulate the economy. This process is a scam because it creates the illusion of economic growth by controlling the supply of money.
